

# VITRUM™ SURFACES

VITRUM slabs are not hazardous when shipped and/or after the slabs are installed at the end user. However fabrication/processing of slabs, which includes cutting, polishing, sanding and drilling, generates dust which may cause the respiratory irritation. CATERGORY 3 H335.

**DANGER RELATED TO DUST GENERATION:** Causes damage to lungs through prolonged or repeated exposure, may cause lung cancer if inhaled, respiratory tract and eye irritation.

**THIS DISEASE IS PREVENTABLE THROUGH APPROPRIATE WORKSAFE PRACTICES.**

**Safety Instructions:** VITRUM highly recommends fabricators and installers strictly comply with health and safety regulations. Wherever this product is fabricated a dust free control environment should be in place in accordance with Worksafe best practices, laws and regulations.
Exposure to dust must be below the exposure limits set by local regulations.

**Prevention:** Workers need to read and full understand all safety requirements and strictly comply with Worksafe rules and regulations before fabricating the product.

Please ensure, but not limited to;
- Wear respiratory protection at all times...Avoid breathing dust while fabricating or installing.
- Use water when cutting at all times
- Air filtration systems should be used at all times
- Do not eat, drink or smoke when fabricating this product
- For more information about dust exposure please visit, **www.dmirs.wa.gov.au**

**First Aid:** Rinse thoroughly if dust makes eye contact. Seek medical advice immediately if feeling unwell.
